

LG 8700X | USER GUIDE

Some of content in this user guide may be different from your phone depending on the software of the phone or your service provider. Features and specifications might be subject to change without prior notice.

Bluetooth QD ID B012603

Visit www.koodomobile.com for the User Guide fully illustrated on how to use your phone. You can find it by clicking Help -> User Guides. Or go to LG website at http://ca.lgservice.com/index_b2c.jsp to browse it.

P/N: MMBB0283101 (1.0) H

Getting Started With Your Phone

Installing the Battery

- Place the edge of the battery that has the battery terminals into the opening on the back of the phone [1], then press it into place [2].
- Align the tabs on the battery cover with the slots on the back of the phone [3], then press the cover down until it clicks [4].

Removing the Battery

- Move the battery latch up [1], then lift the battery cover off [2].
- Lift the left edge (by the LG logo) of the battery [3], then remove the battery.

Charging the Battery

WARNING!

Use only the charger provided with the phone. Using any charger other than the one included with the LG 8700X may damage your phone or battery.

- Attach the charger to the phone. Make sure that the triangle symbol faces up when inserting the plug into the charger port.
- Plug the charger into a wall outlet.

NOTICE
Triangle symbol should face up.

Phone Overview

Camera Lens
Used to take a photo. Keep it clean for optimal photo quality.

Notes

- It's important to fully charge the battery before using the phone for the first time.
- Battery life and signal strength are significant factors (among others) that affect your phone's ability to send/receive calls.

Note

Antenna equipped inside your phone.

Tip

If you hold the phone enclosing the lower edge, you may interfere with the antenna's ability to receive a clear signal which affects call quality for voice or data transfer.

Turning the Phone On and Off

Turning the Phone On

- Install a charged battery or connect the phone to an external power source.
- Press **Power** for a few seconds until the LCD screen lights up.

Turning the Phone Off

- Press and hold **Power** until the display turns off.

Making Calls

- Make sure the phone is turned on. If not, press **Power** for about 3 seconds.
- Enter the phone number (include the area code if needed).
- Press **Call**. If the phone is locked, press the Right Soft Key **Unlock** and enter the lock code (the last four digits of your phone number by default).

Note

- Only emergency calls can be made with the phone locked. To make a non-emergency call, you must first unlock your phone.
- Press **End Call** to end the call.

Receiving Calls

- When the phone rings or vibrates, there are four ways of answering a call, depending on the Answer Options in Call Settings menu:

Notes

- If you press Left Soft Key **Quiet** while the phone is ringing, the ringing or vibration is muted for that call.
- If you press Right Soft Key **Ignore** while the phone is ringing, the call will be sent to voicemail (if subscribed).

- Press **End Call** to end the call.

* Available only when a microSD™ card is inserted.

Menu Access

To use phone menus, press **Navigation** or Left Soft Key **Menu** using Navigation Key to highlight and select. Press the number key that corresponds to the submenu.

Bluetooth®

The LG 8700X is compatible with devices that support the Bluetooth® headset and hands-free profile(s). You may create and store 20 pairings within the LG 8700X and connect to one device at a time.

The approximate communication range for Bluetooth® wireless technology is up to 30 feet (10 meters).

Notes

- Read user guide of each Bluetooth accessory that you are trying to pair with your phone because the instructions may be different.
- The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by LG Electronics is under license. Other trademarks and trade names are those of their respective owners.
- Your phone is based on the Bluetooth® specification, but it is not guaranteed to work with all devices enabled with Bluetooth® wireless technology.

Music Player

This phone allows you to play the music content stored on a microSD™ card.*

- Press **Menu**, **6**, **1**.

Note

- You must first format the memory card for use with music.

Caution

- Formatting the memory card will erase all content currently stored on the card.

- Press Left Soft Key **Mute** to mute the music.
- Press Right Soft Key **Rpt All/Shuffle/Rpt One**.
- Press OK Key to **play or pause**.
- Press the camera key to change the digital equalizer setting.

* microSD™ card sold separately

VIBRATE MODE

Sets the phone to vibrate instead of ring. To set Vibrate Mode press and hold **Vibrate**. To return to Normal Mode, press and hold **Normal**.

Lock Mode

Sets your phone to require your 4-digit password in order to use the phone.

Note

- By default, the lock code/password is the last 4 digits of your phone number. You can change this code/password in Security menu.

How to Use Menus

This section provides a quick glance of features on your phone.

Contacts Menu 1

The Contacts menu allows you to store names, phone numbers and other information in your phone's memory.

New Contact Your phone can store up to 1000 Contacts entries. Contacts entries can store up to a total of five phone numbers and 2 email addresses, and each entry's name can contain 32 characters.

Contact List Allows you to view your Contacts List.

Groups Allows you to view your grouped Contacts, add a new group, change the name of a group, delete a group, or send a message to everyone in the selected group.

Speed Dials Allows you to view your Speed Dials list, designate new Speed Dials, or remove Speed Dial designations entered in your Contacts.

My Name Card You can view your phone number, edit entry and send a name card via Bluetooth. To use this feature, a Bluetooth device compatible with your phone is required.

Call History Menu 2

The Call History Menu is a list of the last phone numbers or Contact entries for calls you dialed, received, or missed. It is continually updated as new numbers are added to the beginning of the list and the oldest entries are removed from the bottom of the list.

Call History Menu 2 (Continued)

- Missed Calls** Allows you to view the list of missed calls; up to 90 entries.
- Received Calls** Allows you to view the list of incoming calls; up to 90 entries.
- Dialed Calls** Allows you to view the list of outgoing calls; up to 90 entries.
- All Calls** Allows you to view the list of recent calls; up to 270 entries.
- View Call Timers** Allows you to view the duration of selected calls.

Messaging Menu 3

- Voicemail** Allows you to view new voice messages recorded in the voicemail box. Your phone will alert you when you receive a new voice message.
- New Messages** Allows you to create a message with Text, Picture/Video and Sound and send it. The limit number of receivers and subject length of your message is displayed on the phone, but it may vary depending the type of your message.
- Inbox** Your phone will alert you when you have new messages.
- Sent** Up to 100 sent messages can be stored in the Sent. View lists and contents of sent messages.

Messaging Menu 3 (Continued)

- Drafts** Displays draft messages.
- Web Alerts** Allows you to store the received web messages in a separate folder.

Web Menu 4

The Web feature allows you to view Internet content, especially designed for your mobile phone. Access and selections within this feature are dependent upon your service provider. For specific information on Web access through your phone, contact your service provider.

- Browse and search the World Wide Web via web pages especially designed for wireless phone customers.
- Set bookmarks to directly access your favorite sites.
- Retrieve information, such as stock quotes and flight schedules from the Internet.

Allows you to download ringtones, sounds, images once the Get New is executed and connected to Browser. In the application homepage, the downloaded ringtones are located under Extras -> Ringtones & Sounds -> Ringtones. For the Images, Extras -> Images & Videos -> Pictures.

Ringtones & Sounds Allows you to connect the browser and download ringtones and sounds.

Images & Videos View, take and send your pictures including downloaded wallpapers. right from your wireless phone.

Memory Info Provides the memory information.

Allows you to play music stored on a memory card.

Safety

TIA (Telecommunications Industry Association) Safety Information
The following is the complete TIA Safety Information for wireless handheld phones.

Exposure to Radio Frequency Signal

Your wireless handheld portable phone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out Radio Frequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

- ANSI C95.1 (1992) *
- NCRP Report 86 (1986)
- ICNIRP (1996)

- Health Canada, Safety Code 6, 1999.

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). The design of your phone complies with the FCC guidelines, IC Regulations (and those standards).

Antenna Care

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

Phone Operation

NORMAL POSITION: Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

Tips on Efficient Operation

For your phone to operate most efficiently:

- Do not touch the antenna unnecessarily when the phone is in use.
- Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

Driving

Check the laws and regulations on the use of ireless phones in the areas where you drive and always obey them. Also, if using your phone while

Safety (Continued)

factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

6. What is the FDA doing to find out more about the possible health effects of wireless phone RF?

The FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radio frequency energy (RF). The FDA has been a leading participant in the World Health Organization International Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The project has also helped develop a series of public information documents on EMF issues. The FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. The FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts with independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. How can I find out how much radio frequency energy exposure I can get by using wireless phones?

All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit radio frequency energy (RF) exposures. The FCC established these guidelines in consultation with the FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless telephones is set at a Specific Absorption Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body's ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers of wireless phones must report the FCC exposure level for each model of phone to the FCC. The FCC website (<http://www.fcc.gov/oet/rfsafety>) gives directions for locating the FCC identification number on your phone so you can find your phone's RF exposure level in the online listing.

Safety (Continued)

driving, please observe the following:

- Give full attention to driving -- driving safely is your first responsibility.
- Use hands-free operation, if available.
- Pull off the road and park before making or answering a call if driving conditions or the law so require.

Electronic Devices

Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of six inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

Persons with Pacemakers:

- Should ALWAYS keep the phone more than six inches from their pacemaker when the phone is turned ON.
- Should not carry the phone in a breast pocket;
- Should use the ear opposite the pacemaker to minimize the potential for interference;
- Should turn the phone OFF immediately if there is any reason to suspect that interference is taking place.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider (or call the customer service line to discuss alternatives.) Optional for each phone manufacturer.

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Health Care Facilities

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care

Allows you to make use of various tools and applications.

Safety (Continued)

facilities may use equipment that could be sensitive to external RF energy.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities

Turn your phone OFF in any facility where posted notices so require.

Aircraft

FCC and Transport Canada regulations prohibit using your phone while in the air. Switch OFF your phone before boarding an aircraft.

Blasting Areas

To avoid interfering with blasting operations, turn your phone OFF when in a "blasting area" or in areas posted: "Turn off two-way radio." Obey all signs and instructions.

Potentially Explosive Atmosphere

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Areas with a potentially explosive atmosphere are often, but not always marked clearly. Potential areas may include fueling areas (such as gasoline stations); below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles (such as grain, dust, or metal powders); and any other area where you would normally be advised to turn off your vehicle engine.

For Vehicles Equipped with an Air Bag

An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Charger and Adapter Safety

- The charger and adapter are intended for indoor use only.
- Do not expose the battery charger or adapter to direct sunlight or use it in places with high humidity, such as a bathroom.

Battery Information and Care

- Please dispose of your battery properly or take it to your local

Safety (Continued)

example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

11. What about wireless phone interference with medical equipment?

Radio frequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, the FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical Instrumentation (AAMI). The final draft, a joint effort by the FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI. The FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a "compatible" phone and a "compatible" hearing aid at the same time. This standard was approved by the IEEE in 2000. The FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, the FDA will conduct direct testing to assess the interference and work to resolve the problem.

12. Where can I find additional information?

For additional information, please refer to the following resources:

- FDA web page on wireless phones (<http://www.fda.gov/celphones/>)
- Federal Communications Commission (FCC) RF Safety Program (<http://www.fcc.gov/oet/rfsafety/>)
- International Commission on Non-Ionizing Radiation Protection (<http://www.icnirp.de>)
- World Health Organization (WHO) International EMF Project (<http://www.who.int/peh-emf/en/>)
- National Radiological Protection Board (UK) (<http://www.hpa.org.uk/radiation/>)

Consumer Information on SAR

(Specific Absorption Rate)
This Model Phone Meets the Government's Requirements for Exposure to Radio Waves. Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for

Safety (Continued)

wireless carrier for recycling.

- Do not dispose of your battery by fire or with hazardous or flammable materials.
- Never use an unapproved battery since this could damage the phone and/or battery and could cause the battery to explode.

- The battery does not need to be fully discharged before recharging.

- Use only LG-approved chargers specific to your phone model since they are designed to maximize battery life.

- Do not disassemble or shortcircuit the battery.

- Keep the battery's metal contacts clean.

- Replace the battery when it no longer provides acceptable performance. The battery can be recharged several hundred times before replacement.

- Recharge the battery after long periods of non-use to maximize battery life.

- Battery life will vary due to usage patterns and environmental conditions.

- Use of extended backlighting, MiniBrowser, and data connectivity kits affect battery life and talk/standby times.

Safety Information

Please read and observe the following information for safe and proper use of your phone and to prevent damage. Also, keep the user's guide in an accessible place at all the times after reading it.

Explosion, Shock, and Fire Hazards

- Unplug the power cord and charger during lightning storms to avoid electric shock or fire.

- Make sure that no sharp-edged items such as animal's teeth, nails, come into contact with the phone. There is a risk of this causing a fire.

- Do not use harsh chemicals(such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. There is a risk of this causing a fire.

- Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.

- Do not drop, strike, or shake your phone severely. Such actions may harm the internal circuit boards of the phone.

- Do not put your phone in a place subject to excessive dust and keep the minimum required distance between the power cord and heat sources.

- Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it is dry.

- Do not damage the power cord by bending, twisting, pulling, or heating. Do not use the plug if it is loose as it may cause a fire or electric shock.

- When using the power plug, ensure that it is firmly connected. If it is

Important Safety Precautions and Warranty Information

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this user guide.

WARNING! Violation of the instructions may cause serious injury or death.

- Never use an unapproved battery since this could damage the phone and/or battery and could cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never store your phone in temperatures less than -4°F or greater than 122°F.

- Do not dispose of your battery by fire or with hazardous or flammable materials.

- When riding in a car, do not leave your phone or set up the hands-free kit near to the air bag. If wireless equipment is improperly installed and the air bag is deployed, you may be seriously injured.

- Do not use a hand-held phone while driving.

- Do not use the phone in areas where its use is prohibited. (For example: aircraft, hospital)

- Do not expose the battery charger or adapter to direct sunlight or use it in places with high humidity, such as a bathroom.

Safety (Continued)

not, it may cause excessive heat or fire.

- Do not use any heavy items on the power cord. Do not allow the power cord to be crimped. It may cause fire or electric shock.

- Do not disassemble the phone.

- Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

- If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone. Always cover the receptacle when not in use.

- Do not short-circuit the battery. Metallic articles such as a coin, paperclip or pen in your pocket or bag may short-circuit the + and – terminals of the battery (metal strips on the battery) upon moving. Short-circuit of the terminal may damage the battery and cause an explosion.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.
